

May 25, 2022

The Tri-County Bass Anglers is working as a partner with the Indiana Division of Fish and Wildlife on our Reservoir Habitat Enhancement program. This includes the habitat work at Monroe Lake for which the group is submitting the grant application for. The DNR currently has a habitat plan and project ongoing at Monroe Lake with 300 structures already placed. This grant funding will help build on that project.

The Tri-County Bass Anglers are providing much needed labor and financial assistance for this program. This group over the years has participated in our build days and received other grant funding to help purchase and build structures. Given their active involvement in this project, the Indiana Division of Fish & Wildlife fully supports the Tri-County Bass Anglers inclusion in this project and for the grant that they are applying for.

Sincerely,

A handwritten signature in blue ink that reads "Dan Carnahan". The signature is fluid and cursive.

Dan Carnahan  
Fisheries Supervisor, Division of Fish & Wildlife
